

***Do you know you can make a high impact factor publication without doing any lab work?
Attend our Workshop on Bioinformatics and learn how to publish good scientific paper by
mining data from different biological databases***

Generating quality data for high impact factor paper publication through the use of computer algorithms: A Bioinformatics Workshop organized by the faculty of Veterinary Medicine, University of Nigeria, Nsukka
Date: 22nd-25th Nov, 2015.
Venue. MTN data Center, UNN Library

.Our Workshop is a hands-on Computer based Bioinformatic training that will focus on::

- ❖ Species specific and degenerate primer design for PCR
- ❖ How to obtain data from different biological databases for high impact factor paper publication.
- ❖ BLAST searches to identify organisms from sequence information
- ❖ Sequence alignment using different alignment softwares
- ❖ Gene sequence comparisons and mutation analysis.
- ❖ Using genes to infer evolution of diseases through phylogenetic analysis
- ❖ Interpretation of data/results from phylogenetic trees

Participation fee is 25,000 naira . For postgraduate students, participation fee is 15,000 naira. Participants should pay into the Faculty of Vet Medicine Account: 5411000824, Ecobank Plc and send their scanned payment receipt to the coordinator: Dr Anthony Mgbeahuruike (Ph.D)

Email: Anthony.mgbeahuruike@unn.edu.ng
08039253623

Or the Faculty Dean, Prof C.O.Nwosu
dean.vetmedicine@unn.edu.ng
08056493282

Please indicate through email if you need accommodation as we can arrange that at a cheaper cost. For accommodation issues contact : Dr. C. O Nwaigwe
