

# Postdoctoral Research Position in Environmental and Resource Economics

## Extension of Advert to 8 June 2018

Type of employment: Fixed-term employment, 2-3 years (31 months)

Extent: 100 %

Location: Department of Agricultural Economics, University of Nigeria Nsukka

First day of employment: July 1 2018

Reference number: AGECE/Postdoc/003

The Department of Agricultural Economics, University of Nigeria Nsukka, offers a postdoctoral research position. The department has around 50 employees. In terms of research, it has several core strengths including behavioral, development, Finance and environmental economics, where researchers work on valuation of non-market goods, climate, energy and natural resource management. The department is connected to the global research network The Environment for Development (EfD) Initiative. EfD is a capacity building program in environmental economics focusing on research, policy interaction, and academic programs. Find more information about the department at [www.unn.edu.ng](http://www.unn.edu.ng) and information about EfD via: [www.efdinitiative.org](http://www.efdinitiative.org).

## Job assignments

The position mainly involves 100% research. The position focuses on marine challenges and is linked to the EfD collaborative research program **Sustainable Management of Marine Resources**.

The program has two themes: *Effective Management of Fisheries*; and *Combating Marine Pollution*. The research under the first theme may investigate the management of fisheries when institutions are poorly developed and when fairness and distributional aspects are prioritized, which is often the case for developing countries. The research under the second theme will focus mainly on marine litter and debris. Whether marine pollution is most properly addressed by legal means, economic policy instruments, attitudinal and behavioral changes or a mix of all is an open question where more research is needed. Our focus is primarily economics, but multidisciplinary approaches are certainly well motivated within this program.

The Program is carried out in a collaborative effort together with researchers at 10 other EfD centers around the world. The candidate is expected to contribute to the research of the Program. That also includes to take active part in the general work of the Program, e.g., by participating in joint meetings, seminars and conferences. The research can involve evaluation of current incentives and behavior, but also design of new incentive mechanisms. We particularly welcome research that focuses on a global or regional context with a clear link to developing countries. The work can be theoretical or empirical. We expect candidates to aim at publishing in international peer reviewed journals. There will be funds available for travel and shorter visits to other universities, as well as support for carrying out data collection.

## Qualifications

Applicants should hold a recent PhD in economics or Agricultural Economics, or be close to finishing their thesis. Research in environmental and resource economics and behavioral economics is valuable. Experience of marine issues as well as multi-disciplinary work is appreciated. The applicant who, in the overall assessment of skills and potential, is deemed to be best suited to carry out the identified job assignments will be selected for the post. Research

potential will be our key selection criterion, with a particular emphasis on the degree of progression and forward-looking aspects of the research. We expect applications from West Africans especially Nigerians who have a doctoral degree not older than 3 years or are close to graduating and who preferably studied in a university in Europe or North America.

Long-listed candidates will be interviewed via video link. Short-listed candidates will be invited to our department for interviews and research seminars after June 15, 2018

### **Additional Information**

The application must contain:

- Résumé/CV and personal details.
- Educational certificates and diplomas should be attached.
- A declaration of intent on a maximum of two pages in which the applicant explains how he/she intends to work if he/she is offered the position.
- Research activities, a brief written account of the applicant's own academic research activities.
- One relevant and recently produced paper (job market paper).
- Two letters of recommendation should be sent directly to [ozroma.ezegbe@unn.edu.ng](mailto:ozroma.ezegbe@unn.edu.ng). Please mark the reference number AGECE/Postdoc/003.
- All attachments must be named with reference number AGECE/Postdoc/003.

Additional material might be requested.

The application should be sent to:

Ozioma Ezegbe ([ozroma.ezegbe@unn.edu.ng](mailto:ozroma.ezegbe@unn.edu.ng)), Department of Agricultural Economics, University of Nigeria Nsukka, Enugu State, Nigeria.
