KEYWORDS

There should be keywords that can be used for indexing. A maximum of 6 words is allowed.

INTRODUCTION

The introduction should provide background information on the problem including recent or current references to work done by previous researchers. It should end with the objectives and contribution of the work.

MATERIALS AND METHODS

This section can vary depending on the nature of the paper. For papers involving experiments, the methods, experimental design and details of the procedure should be given such that another can verify it. Standard procedures however should not be presented. Rather, authors should refer to other sources. This section should also contain description of equipment and statistical analysis where applicable. For a paper that involves theoretical analysis, this is where the theory is presented.

RESULTS AND DISCUSSION

Results should give details of what was achieved and be presented in descriptive, tabular or graphical forms. Discussion on the other hand, describes ways the data, graphs and other illustrations have served to provide answers to questions and whether they agree with results obtained by other authors.

CONCLUSION

Conclusion should present the highlights of the solutions obtained. It should be brief, stating what the study was about, the major results obtained and whether the results were conclusive, and recommendations for future work, if any.

REFERENCES

All sources mentioned in the text should be listed and vice versa.
