NATIONAL TRAINING WORKSHOP
ON**

**WORKSHOP PRACTICES: DESIGN,
FABRICATION, INSTALLATION AND
MAINTENANCE**

DATE

4th - 7th July, 2021

TIME

10:00am Daily

VENUE

NCemd

University of Nigeria, Nsukka.

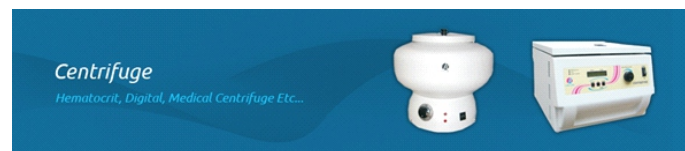

WORKSHOP FOCUS/EXHIBITION

Exhibitions of the Centre's Technical capacities and capabilities;

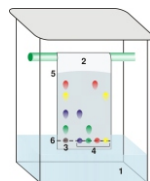

- Technical presentations by experts;
- Hands-on practical session:
 - Water Bath
 - Basic design, principles and installation of:
 - Hot air oven;
 - Genotype machine
 - Microhematocrit Centrifuge
- Instruments for basic chromatography
- Laboratory water distillation.

LECTURE TOPICS

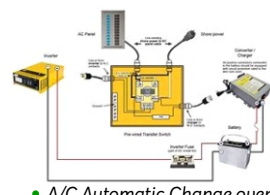

- Basic design, fabrication, operation of automatic change-over
- Basic design, fabrication, operation and maintenance of fuel-less generator
- Basic design, fabrication, operation and maintenance of hot air oven;
- Basic design, fabrication, operation and maintenance of water bath;
- Design, fabrication and operation of Hematocrit Centrifuge;
- Design, fabrication operation of Genotype machines
- Procedures for generating distilled water in the laboratory;
- Basic chromatographic techniques in the laboratory.

• Centrifuge Hematocrit, Digital, Medical Centrifuge.

• Glass Chromatography Tank

• A/C Automatic Change over

• Water Distiller

• Fuel Less Generator

• Low Temperature Water Bath

• Hot Air Oven

• Genotype Machine

• Water Bath

NOTE: Our locally designed and fabricated Genotype machines are already in use in the University of Nigeria Medical Centre, Nsukka.

No prior experience in laboratory techniques is needed for participation in this Training Workshop.

TARGET AUDIENCE

- Technologists/Technicians in institutions of Higher learning.
- Medical Technologists
- Entrepreneurial organists.
- Interested young Scientists
- Artisans in public sectors
- Others

- Photographs of participants during training session at the immediate past workshop.
