

CALL FOR ABSTRACTS

International Conference on "Corporate Entities, Innovations and Technologies"

Corporate entities are increasingly in the spotlight in light of the explosion of innovations and technologies as well as their role in national, regional and global businesses. While corporate entities are leveraging technological and innovative solutions to deliver state of the art services, they equally encounter constraints that challenge their competitiveness. Additionally, corporations are increasingly under scrutiny for their actions and inactions nationally, regionally and globally.

Thus, corporate entities are faced with: (1) the market for competitive technology and innovation, (2) shareholders/stakeholders pressure; and (3) the imperative for sustainable business practices. The preceding is compounded by the fact that not all these areas are robustly covered by the extant laws. Even where there is regulatory coverage, enforcement is impaired particularly in developing countries.

Against this backdrop, the conference seeks abstracts that explore how innovation and technologies impact corporate entities as well as the role and failure of corporate entities in national, regional and global businesses.

Abstracts should be submitted via this email: corporatelaw.research@unn.edu.ng.

Decision(s) on the abstract will be communicated within 1 week of submission.

Submission of abstracts should relate to any of these sub-topics below:

PART 1

1. Corporate Power and Responsibilities
2. Competition Regulation and Corporate Communications
3. Insolvency Proceedings and Business Rescue Options
4. Globalization and Corporate Financing
5. Capitalization, Floatation of Securities and Merger Options
6. Digital Asset Acquisition and Regulation of Cryptocurrency
7. Foreign Portfolio Investment and Securities Lending Transactions
8. Digitalization of Business Activities and Regulatory Compliance
